**DETAILED ACTION**  
**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. The following corrections in the claim were made in accordance with discussions made in a phone interview with the inventor's representative Mr. Aldo J. Test on September 28, 2004. The following changes in the application have been made:

Independent claim 10 has been canceled.

***Allowable Subject Matter***

3. An "Amendment" was received on September 14, 2004 in response to Office Action of May 6, 2004. Claims 1, 5 and 7 have been amended and claim 2 canceled, as indicated.

4. Claims 1 and 3-9 are allowed.

5. The following is an examiner's statement of reasons for allowance:

With respect to independent claim 1, prior art fails to disclose a device for collecting ions, in particular in a mass spectrometer, having at least one secondary electron multiplier (SEM), the SEM being formed in the manner of a card, specifically substantially box-like with a low thickness in relation to the length and width. The device according to the invention is characterized in that the SEM is held in a frame. The frame

Art Unit: 2881

can have approximately the dimensions of the Faraday cup, which would be otherwise used. The SEM is insertable and removable from the frame. Accordingly, the frame is preferably somewhat thicker than the SEM. As a result of using the frame, the external dimensions of the SEM are matched to the dimensions of other constituent parts of the device. At the same time, the frame permits easy replacement of the SEM. In this way, the SEM can be held in the frame merely by being wedged in. In one embodiment of the invention, provision is made for the SEM to have an entry opening for the ions on a narrow side, for the frame to have a passage opening for the ions on a narrow end side, the inlet opening and the passage opening being aligned with each other, and for the SEM to be at least partially inserted into the frame on a further narrow side of the latter. According to a further embodiment of the invention, a plurality of SEM are provided with frames, the frames being held on at least one common guide means and being capable of being positioned relative to one another at defined intervals on the latter. Accordingly, the guide means permit a plurality of frames to be combined into a group, it being possible for defined positions to be assumed within the group. At least one frame of the group is preferably provided with a holder, so that the result is that a group with a plurality of SEM (in corresponding frames) is held only by one frame. The guide means provided are preferably two rods, onto which the individual frames are threaded with appropriate holding means.

Claims 3-9 are allowed by virtue of their dependencies on the independent claim 1.

### Conclusion

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments of Statement of Reasons for Allowance".
